

General Electric Loadable Defaults Definition Tool Available for Download

Dear valued GE Aviation FMS customer,

The most recent version of the GE Aviation Adaptable Datalink Definition Tool (ADDT) is available to download.

<https://www.geaviation.com/systems/avionics/navigation-guidance/database-services>

Follow these steps to download and install the software:

1. Click on the “Adaptable Datalink Definition Tool.zip” link.
2. Click on the “Save” button when prompted and provide a location on your local computer for the file to be downloaded.
3. Unzip the file after the download completes.
4. Double click on AdaptableDatalinkDefinitionTool.exe to run the installation tool.
5. Follow the prompts of the setup wizard.
 - a. Read and accept the End User Software License Agreement. Click “Next>”.
 - b. Select the Destination Location for the ADDT by clicking the “Browse...” button or accept the default location which is C:\Program Files (x86)\GE Aviation Systems LLC\ADDT.
 - c. Click “Next>”
 - d. Confirm “Create a desktop shortcut” is checked if you want to create a desktop shortcut.
 - e. Click “Next>”.
 - f. Click “Install”.
 - g. Click “Finish”.
6. You will be prompted to request a license file. Select “Request License...”
