

# Avionics Services

## Operational readiness for the long haul

GE has over 100 years of experience in the aviation industry and is a leading provider of avionics services. As part of our dedication to supporting avionics, GE performs repairs and provides spares on equipment for a wide range of U.S. and international military aircraft including tankers, fighter jets, helicopters, and other multi-mission applications. Our experience in both the civil and military sectors of the industry fosters a reliable, robust supply chain enabling us to consistently meet your logistics and material readiness needs.

### **Preparation for entry into service**

GE's knowledgeable support team is available to train military technicians for entry into service, enabling you to develop an optimized maintenance plan with cost per flying hour in mind.

### **Support during your most critical time of need**

Our global support centers offer customers access to technical expertise and Mission Impaired Capability Awaiting Parts (MICAP) services around the clock. Our team understands your operations and can be trusted to deliver.

### **Safeguard against obsolescence**

Proactive obsolescence evaluation and management helps customers prepare for any necessary service life extensions. We offer services to keep your platforms ready and operational while maximizing the life expectancy of your fleet.

## Customizable MRO and risk-transfer products and services

### **Menu-based repair offerings**

GE's Firm-Fixed Price catalog provides simplified administration through workscope repair categories.

### **Partnering to enhance the value of your investment**

Strong partnerships are a critical ingredient in our portfolio. We partner with airframers, military program offices, depots, and other industry leaders to ensure your needs are met with quality and continuity of service in mind.

### **Financial offerings and contracts to manage risk**

Various types of customizable government contract agreement options, including Performance-Based Logistics (PBL) and Indefinite Delivery/Indefinite Quantity (IDIQ) contracts help offset operational and financial risks associated with management of your fleet.

### **World-class test integration equipment provider**

Our expertise in avionics test equipment and test solutions for military fleets enables customers to rapidly identify faults, reduce No Fault Finds (NFFs), and support fleet availability.
